SHAKTI RAIL COMPONENTS PVT. LTD.

QUALITY PROCEDURE — INCOMING MATERIAL INSPECTION AND CERTIFICATE VERIFICATIO

1. PURPOSE. Ensure every lot of castings, plates and forgings conforms to the drawing material grade before use.
2. RESPONSIBILITY. Stores receives; Quality (incoming inspection) verifies; QA Manager approves concessions.
3. CERTIFICATE VERIFICATION (clause 3).
   3.1 Check the certificate is EN 10204 type 3.1 and lists heat number, PO, quantity and material grade.
   3.2 Confirm the material grade matches the CURRENT revision of the drawing (drawing register). Superseded revisions must not be used for acceptance.
   3.3 Compare every chemical and mechanical value with SRC-SPEC-MAT-01 for the grade and section thickness.
   3.4 Confirm required tests are reported at the specified conditions (e.g. Charpy at -20 C for J2 grades).
   3.5 Record the verdict against the heat number in the incoming inspection log.
4. NON-CONFORMANCE (clause 4).
   4.1 Quarantine the lot with a HOLD tag within 2 hours of the finding.
   4.2 Raise an NCR citing the certificate, the failed property, the specified limit and the source clause.
   4.3 Inform the vendor and Purchase the same day; request a corrective action report within 7 days.
5. SAMPLING. Castings for bogie side frames: first 3 pieces of each new heat to radiography (RT) and dimensional check.
6. RECORDS. Certificates and verdicts are retained for 10 years (RDSO audit requirement).

Approved: N. Verma (QA Manager) Date: 02 Jul 2026
